

Product Integration

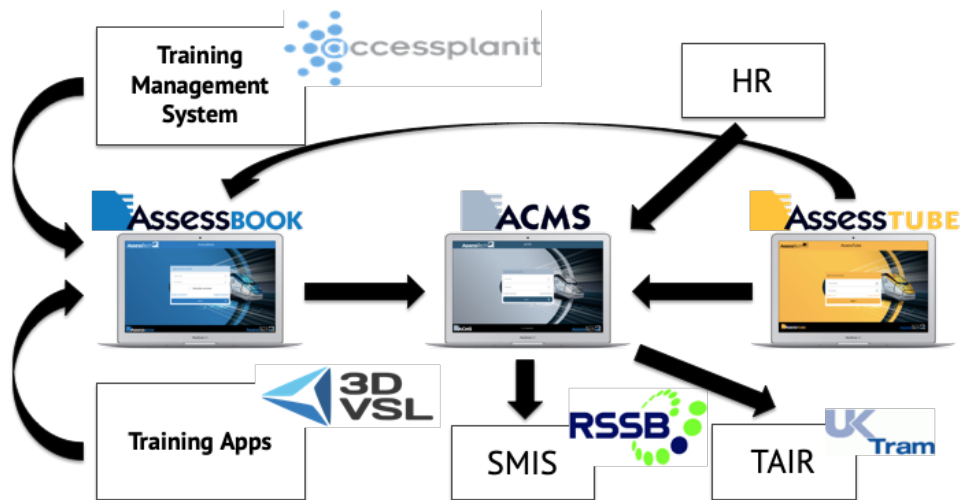

Current Integration

Whilst it is a long-term goal to fully integrate all **AssessTech** products, at present platform integration encompasses the following features:

- User accounts can be linked through the use of a common email address
- The **ACMS** Candidate Dashboard includes an AssessBook tab, in which the user's course status in **AssessBook** is stored
- **ACMS** Reports including Candidate and Summary Reports can contain data from **AssessBook**

The Vision

We at **AssessTech** are currently working toward the following integration model being the mode of operation for our platforms:

This would then realise key features such as:

- [Single Sign-on](#)
- **ACMS** Audiences being pushed to **AssessBook** and **AssessTube**
- Directed Learning Content
- **ACMS** Schedules Integration that would link with **AssessBook** courses and **AssessTube** videos to become part of the competence cycle and link with performance criteria (as per following diagram)
