

# AssessTech Training Knowledge Base

Welcome to the **AssessTech Knowledge Base**

In this area you can find links to information about our training courses. If you are looking for information about AssessTech Products, click [here](#).

As a certified **City & Guilds** centre, **AssessTech** offers training and qualifications in a broad range of subjects, but principally related to **Competence Management** and the **Railway Industry** more generally.

In addition to courses resulting in **City & Guilds Accredited Qualifications (Awards and Certificates)**, we also offer **Non-accredited Training Programs**, as well as our own engaging **Interactive Training Aids**.

As one of the UK's leading training partners to the UK Rail Industry, we understand how important it is for the safety of your staff, customers and the railway as a whole to maintain staff training and assessments. Therefore, in response to the global pandemic, we have now moved all of our classroom training online, using video-conferencing and our rapidly-assembled virtual training room.

We are also conducting assessments remotely via video-conferencing and have been investing in new technology to enhance this experience.

We have even developed online versions of our **Interactive Training Aids** so delegates can still enjoy the benefit of utilising these aids without the need to be physically close.

To find out more about what we offer, follow the links below:
